

EDUCATION

Nanyang Technological University, Singapore Jul 2024 - May 2028
Bachelor of Engineering (Mechanical Engineering), Minor in Business, CGPA: 4.58 / 5.00

- Expected Honours (Highest Distinction)

PROFESSIONAL EXPERIENCE

McKinsey & Company Aug 2026 - Present
Student Consultant (YL4I)

- Analysed strategic and operational business challenges using structured problem-solving frameworks to identify core bottlenecks and key areas for optimisation.
- Formulated and pitched a comprehensive strategy to industry experts, synthesising project findings into actionable, data-driven recommendations.

Lendingpot (PhillipCapital) - SME Business Loans Marketplace May 2026 - Jul 2026
Business Analyst Intern

- Executed comprehensive market landscaping and competitor bench-marking to identify market gaps, formulating data-driven growth strategies to optimise customer acquisition and retention.
- Managed the inbound deal pipeline, constructed dynamic Excel models to track operational KPIs and synthesised complex data into management presentations to drive strategic business objectives.

Far East Hospitality Mar 2024 - Jul 2024
Reservation Sales Executive

- Managed revenue optimisation across a 25-property hospitality asset portfolio, applying demand elasticity analysis and dynamic pricing models to maximise revenue and portfolio yield.

CO-CURRICULAR ACTIVITIES & COMMUNITY SERVICES

Thrive Social Consulting Club Jul 2026 - Present
Project Leader

- Directed the strategic application of MECE-structured, hypothesis-driven frameworks to diagnose complex organisational bottlenecks and prioritise high-impact transformation strategies for non-profit clients.
- Currently leading a six-person team to conceptualise, finalise, and deliver a comprehensive project blueprint for a client's 2027 non-profit expansion pilot, culminating in a formal presentation to the organisation's leadership.

Infineon Supply Chain Case Challenge 2026 Jun 2026 - Jul 2026
3rd Place

- Built a route-optimisation model across 240 shipments and 3,800 candidate lanes, outperforming baseline routing by ~10% on a weighted cost/time/risk objective to secure 3rd place out of 60 teams.
- Uncovered a capability gap affecting 15% of the shipment portfolio (zero facilities supporting a required handling capability at two production stages), turning it into a costed infrastructure recommendation.

ACADEMIC PROJECTS

Lumidose (Smart Pill Organiser) Feb 2026 - Jun 2026
Medical Device Prototype

- Conducted comprehensive market landscaping within the \$1.92B smart healthcare sector, identifying a strategic gap to capture market share from desktop-bound, subscription-heavy incumbents.
- Engineered a portable, Bluetooth-integrated hardware prototype, applying user-centric design principles to accommodate polypharmacy variables and eliminate digital accessibility barriers.

Monte Carlo Portfolio Risk Simulation Engine Feb 2026 - Mar 2026
Python

- Developed a Python-based Monte Carlo engine to model multi-asset portfolio risk over a 1-year horizon using correlated geometric Brownian motion and Cholesky decomposition across 10,000+ paths.

LEADERSHIP EXPERIENCE

Hall of Residence 9 Freshman Orientation Programme Sep 2025 - Aug 2026
President

- Directed end-to-end planning and execution of a multi-day orientation programme for 200+ freshmen, leading a 60-member organising committee across logistics, welfare, and programme design.

SKILLS & CERTIFICATES

- Engineering Design: SolidWorks
- Programming and Tools: Python, Jupyter Notebook
- Microsoft Office: Excel, PowerPoint, Word
